CONTENTS OF VOLUME XXXI.

GREENWALD, ISIDOR, and WEISS, MORRIS L. The fate of inosite administered to dogs 1

CURRIE, JAMES N. The citric acid fermentation of *Aspergillus niger*. Plates 1 and 2 15

JONES, WALTER, and READ, B. E. Uracil-cytosine dinucleotide 39

READ, B. E. Guanine mononucleotide (guanylic acid) and its preparation from yeast nucleic acid 47

HARDING, VICTOR JOHN, and MASON, EDWARD H. The estimation of chlorides in body fluids 55

WILDER, RUSSELL M. Intravenous injections of β-hydroxybutyric and aceto-acetic acids 59

HOAGLAND, RALPH. The quantitative estimation of dextrose in muscular tissue 67

BLOOR, W. R., and MACPHERSON, D. J. The blood lipoids in anemia 79

FALK, K. GEORGE. Studies on enzyme action. XIV. Further experiments on lipolytic actions 97

KURIYAMA, SHIGENOBU, and MENDEL, LAFAYETTE B. The physiological behavior of raffinose 125

OSBORNE, THOMAS B., and MENDEL, LAFAYETTE B. The rôle of vitamines in the diet 149

BOGERT, L. JEAN. A note on modifications of the colorimetric determination of uric acid in urine and in blood 165

GEILING, E. M. K. The nutritive value of the diamino-acids occurring in proteins for the maintenance of adult mice 173

FRANKEL, EDWARD M. Studies on enzyme action. XV. Factors influencing the proteolytic activity of papain 201

HENDERSON, YANDELL, and MORRISS, W. H. Applications of gas analysis. I. The determination of CO_2 in alveolar air and blood, and the CO_2 combining power of plasma, and of whole blood 217

MCCOLLUM, E. V., and PITZ, W. The "vitamine" hypothesis and deficiency diseases. A study of experimental scurvy 229

DUBIN, HARRY. The influence of bile on phenol production 255

KINGSBURY, F. B., and SEDGWICK, J. P. The uric acid content of the blood of new-borns 261

MCCLENDON, J. F., SHEDLOV, A., and THOMSON, W. The hydrogen ion concentration of the ileum content 269

GOSS, B. C. Light production at low temperatures by catalysis with metal and metallic oxide hydrosols 271

WARNER, D. E., and EDMOND, H. D. Blood fat in domestic fowls in relation to egg production 281

317012

READ, B. E., and TOTTINGHAM, W. E. Tritico nucleic acid 295
MORSE, MAX. The proteoclastic tissue enzymes of the spleen 303
SHERWIN, CARL P. Comparative metabolism of certain aromatic acids. 307
HARVEY, E. NEWTON. Studies on bioluminescence. VIII. The mechanism of the production of light during the oxidation of pyrogallol 311
JONES, WALTER, and READ, B. E. The structure of the purine mononucleotides 337
LOEB, JACQUES. The similarity of the action of salts upon the swelling of animal membranes and of powdered colloids 343
LEWIS, HOWARD B. The metabolism of sulfur. II. The influence of small amounts of cystine on the balance of nitrogen in dogs maintained on a low protein diet 363
RICHARDSON, ANNA E., and GREEN, HELEN S. Nutrition investigations upon cottonseed meal. III. Cottonseed flour. The nature of its growth-promoting substances, and a study in protein minimum 379
MOULTON, C. R. The availability of the energy of food for growth ... 389
KOCH, W., and KOCH, M. L. Contributions to the chemical differentiation of the central nervous system. IV. The relative amount of sheathing substance in the corpus callosum and intradural nerve roots (man and dog) 395
KOCH, GEORGE P. The effect of different salts on ammonia formation in soil 411
HART, E. B., HALPIN, J. G., and STEENBOCK, H. The behavior of chickens restricted to the wheat or maize kernel. II. Plate 3 .. 415
GIVENS, MAURICE H., and MENDEL, LAFAYETTE B. Studies in calcium and magnesium metabolism. I. The effects of base and acid .. 421
GIVENS, MAURICE H. Studies in calcium and magnesium metabolism. II. The effect of diets poor in calcium 435
GIVENS, MAURICE H. Studies in calcium and magnesium metabolism. III. The effect of fat and fatty acid derivatives 441
HART, E. B., and HUMPHREY, G. C. The relation of the quality of proteins to milk production. III 445
STEHLE, RAYMOND L. A study of the effect of hydrochloric acid on the mineral excretion of dogs 461
PETERS, JOHN P., JR., and GEYELIN, H. RAWLE. The relation of adrenalin hyperglycemia to decreased alkali reserve of the blood 471
FOSTER, G. L. A modification of the McLean-Van Slyke method for the determination of chlorides in blood 483
HOAGLAND, RALPH, and MANSFIELD, C. M. The function of muscular tissue in urea formation 487
HOAGLAND, RALPH, and MANSFIELD, C. M. Glycolytic properties of muscular tissue 501

McClendon, J. F., Shedlov, A., and Thomson, W. Tables for finding the alkaline reserve of blood serum, in health and in acidosis, from the total CO_2 or the alveolar CO_2 or the pH at known CO_2 tension 519
Sure, Barnett, and Hart, E. B. The effect of temperature on the reaction of lysine with nitrous acid 527
McGuigan, Hugh, and Ross, E. L. Methods for the determination of blood sugar in reference to its condition in the blood 533
Baumann, L., and Hines, H. M. The origin of creatine. II 549
Denis, W., and Minot, A. S. The production of creatinuria in normal adults 561
Robertson, T. Brailsford, and Delprat, M. Experimental studies on growth. IX. The influence of tethelin upon the early growth of the white mouse 567
Bloor, W. R. The blood lipoids in nephritis 575
Osterhout, W. J. V. The dynamics of the process of death 585
Levene, P. A. The structure of yeast nucleic acid 591
Levene, P. A., and Meyer, G. M. The removal of nitric acid from solutions of organic compounds 599
Clark, E. P., The preparation of lyxose 605
Levene, P. A. Chondrosamine and its synthesis 609
Levene, P. A., and Meyer, G. M. The relation between the configuration and rotation of epimeric monocarboxylic sugar acids. III. The phenylhydrazides 623
Levene, P. A., and Meyer, G. M. Cerebrosides. III. Conditions for hydrolysis of cerebrosides 627
Levene, P. A., and West, C. J. Cerebrosides. IV. Cerasin 635
Levene, P. A., and West, C. J. Cerebrosides. V. Cerebrosides of the kidney, liver, and egg yolk 649
Index to Volume XXXI 655
